PROFESSIONAL SUMMARY

Angular Developer with 1 year of experience building HR and talent management platforms. Contributed to the development of multi-role Angular 17 applications used by employees, HR teams, and managers. Experienced in scalable UI architecture, REST API integration, and delivering production-ready features aligned with real business workflows.

TECHNICAL SKILLS

Frontend: Angular 17+, TypeScript
Styling: SCSS, Bootstrap, Responsive Design
State & Async Handling: RxJS, Angular Services, HTTP Client
API Integration: REST APIs, Authentication Interceptors, Error Handling
UI Development: Component-based Architecture, Reusable Components, Data Tables (Pagination, Filtering, Sorting)
Tools: Git, GitHub, Postman, Figma-to-Code, AI-assisted develoment (Copilot, Codex)

PROFESSIONAL EXPERIENCE

Scrutinysoft   Sep 2025 – Present
Angular Developer   *India*
- Owned frontend development for Angular 17–20 HR platforms — Talents (Employee), TalentsHug (HR), and TalentsPro (Manager)
- Built HR modules including attendance tracking, claims lifecycle management, appraisal workflows, and HR reporting dashboards
- Rebuilt the entire frontend using Angular 20 while transitioning from a legacy paid template to a new enterprise template, rewriting all core modules without reusing legacy template code
- Integrated high-volume REST APIs using Angular services and RxJS with pagination, filtering, sorting, and role-based UI rendering
- Implemented authentication flows and global HTTP interceptors to standardize API communication and improve reliability

System Star LLC   Dec 2024 – Jun 2025
Software Developer Intern   *India*
- Contributed to SEO optimization initiatives for customer-facing pages by implementing structured data, on-page improvements, and performance fixes to enhance search visibility
- Collaborated with UI/UX designers to translate Figma designs into fully responsive, production-ready Angular layouts
- Redesigned key application layouts from scratch, ensuring design accuracy, responsiveness, and cross-browser consistency
- Supported the migration of an internal admin application from static HTML to an Angular-based architecture

PROJECTS

Finance Tracker Web Application   Angular, TypeScript, Local Storage

- Built a personal finance tracking application to manage income, expenses, and financial summaries
- Developed the application using AI-assisted development tools (Antigravity, Copilot) for code scaffolding, feature implementation, and debugging
- Implemented Angular services and component-based architecture for dynamic data updates and UI rendering

EDUCATION

Bachelor of Engineering – Electrical and Electronics Engineering   2021 – 2025
Kongunadu College of Engineering and Technology   *Trichy, Tamil Nadu*
- CGPA: 7.89 / 10
